PREFACE.

THE first edition of THE PARLIAMENTARY DIRECTORY AND STATISTICAL GUIDE is presented to public favor in full confidence that its publication will meet a want not heretofore so well supplied.

The book will be found to embrace several new and useful features—interesting, it is believed, not only to members of both Houses of Parliament but to officials and others desiring a work of reliable reference.

The plan of the book is somewhat similar to that of the CONGRESSIONAL DIRECTORY, the second edition of which has appeared, but the scope of the PARLIAMENTARY DIRECTORY will be found more comprehensive than that of its American prototype.

The letter-press was partly executed last season, but was not completed owing to the difficulty of collecting some information for its pages. Hence an "Addenda," which brings the corrected information up to date; and by this means, for the first issue, the purpose intended has been reached.

THE PARLIAMENTARY DIRECTORY will be published each Session, after the organization of the Committees of both Houses, its pages being revised each season, and its scope enlarged by taking in matters of Provincial Legislative interest, as well as that of a Dominion character—in which interest, especially, the work has been issued.

The names of Senators and Commoners have been alphabetically arranged, and further to meet the requirements of social life, a system has been adopted whereby it can be easily ascertained if a wife, daughter or other ladies accompany legislators to the city—the city address being given.

Suggestions for future guidance will be gladly received by the editor, whose address will be found on the title page. Meantime a generous consideration of the difficulties attending the compilation of such a work, taking in, as it does, matters untouched by previous authors, is respectfully asked by

THE EDITOR.

HOUSES OF PARLIAMENT

A REVIEW

Of the progress of the PARLIAMENTARY and DEPARTMENTAL BUILDINGS of the Dominion of Canada, from their inception to their completion, with contract price, &c., for each; also, a general description of the Buildings when finished—area of Grounds, &c., &c.

On the 24th March, 1857, Resolutions were passed by the House of Assembly towards fixing a place as the permanent Seat of Government as follows: "That the sum of Two hundred and twenty-five thousand pounds be appropriated for the purpose of providing for the necessary Buildings, and that an Address be presented to her Majesty praying Her to select some one place as the Permanent Seat of Government in Canada."

A despatch from the Colonial Secretary, dated 31st December, 1857, conveying Her Majesty's selection of Ottawa as the Seat of Government, was communicated to both branches of the Legislature on the 16th March, 1858.

The place having been thus chosen, the site was immediately fixed upon, and a notice issued by the Department of Public Works, dated 17th May, 1859, inviting architects to prepare and submit designs for Parliament and Departmental Buildings, such designs to be received at the Department not later than the 1st day of August next following; also stating that the structures "are proposed to be built in a plain, substantial style of architecture, of coarse hammer-dressed masonry, &c., and that the necessary information relative to sites, size, number of rooms, &c., necessary for the preparation of plans, could be obtained at the office of the Department. Sixteen designs were submitted for Parliament and seven for Departmental Buildings, by fourteen and seven competitors respectively. The first premium for Parliament Buildings was awarded to Messrs. FULLER & JONES, and for the Departmental Buildings to Messrs. STENT & LAVER.

These gentlemen were instructed by the Department to make

certain alterations in their plans, with a view to their better adaptation to the purposes contemplated, such changes to be made and specifications prepared by the 15th October following.

Later, public notice was given that the tenders for the construction of the Buildings would be received until 15th November, when it was found that twenty-one were received for the Parliament and twenty-nine for the Departmental Buildings.

The tender of THOMAS MCGREEVY (now Hon.) was accepted for the construction of the Parliament Buildings, for the bulk sum of $348,500, the contract being entered into with him on 7th December, 1859, for the completion of the work by 1st day of July, 1862. About the same date the contract for the construction of the Departmental Buildings was awarded to Messrs. JONES, HAYCOCK & CLARKE, for a bulk sum of $278,810, and the time fixed for their completion was the 1st February, 1862.

The architects whose designs received first premium were appointed by the Government to superintend the execution of the work of the respective Buildings, and were paid a commission of about five per cent. upon the contract sum. As no adequate provision had been made for heating and ventilation in the accepted plans, a notice, dated 14th November, 1859, was issued calling upon competent parties to tender for this service on or before the 30th December, and to submit in detail the system which they proposed to adopt, with a guarantee of its efficiency, &c., for a period of at least ten years after completion.

In compliance with the latter notice, nine tenders were received, and after due consideration, on the 28th January, 1860, the work was awarded to CHARLES GARTH, at a bulk sum of $61,285. This was understood to include the whole of the furnishing and fitting up of apparatus necessary for all the Buildings, except alterations that might afterwards be made as to the mode of heating the wings of the Parliament Buildings.

The building contractors commenced operations on the 20th December, and were principally occupied during the winter of that year, 1859–60, in the excavations for foundations, preparing materials and making other arrangements for the carrying on of the works during the ensuing summer. The masonry was commenced on the Parliament Building on the 26th April, 1860, and in June the foundation of the main Central Tower was laid. On the Eastern Departmental Building

EASTERN BLOCK (DEPARTMENTAL BUILDINGS

operations were begun on the 2nd April, and the works were from that time proceeded with generally.

On Saturday, the 1st September, 1860, His Royal Highness the Prince of Wales laid the Corner-stone of the pier immediately under the north-east angle pillar of the Legislative Council Chamber, and the early part of December building operations were generally stopped for the winter. The works were now fully under way, and it became necessary to obtain more ample information in regard to the expenditure on and management of the works than was in the possession of the Department. With this object in view the Chief Engineer was ordered to be sent to Ottawa to report fully on all matters connected with the general character, superintendence, and progress of the works, &c., from the commencement up to that period. A report in detail was submitted by that officer on the 20th April, 1861, recommending certain changes, by which the works could be resumed under a different system of management and supervision.

During the latter part of the season of 1861 the appropriation having become exhausted, work was suspended by order of the Hon. the Commissioner.

On the 21st September, 1861, the Hon. H. H. Killaly was instructed to proceed to Ottawa, and ascertain the best arrangements which could be made for protecting the Buildings during the ensuing winter, and to report upon their condition generally and the best mode of settlement with the Contractors for work performed, &c.

He submitted his report, which contained the amounts in his opinion that should be paid to the contractors for the various items of work performed; and later, sent estimates of the work done in October and November, 1861; and still later, another Report containing a summary of his previous estimates, also an estimate of the probable cost of completing the Buildings.

In 1862 the sum of $188,344.30 was appropriated under the head of unprovided items for the previous year—and a further sum of $500,000 was granted by the Legislature towards the construction of the Buildings.

The Contractors urging a settlement for the works they had performed, and alleging certain claims for their suspension, a Commission was appointed under the Great Seal of the Province, on the 21st June, 1862, to enquire into matters connected with the construction of the

Buildings, and management of the works, so far as they had been proceeded with, and to advise the Government as to the best method of carrying them on in future, and to supply an estimate of the probable cost of their completion. At this time there had been paid to Thomas McGreevy, for work performed, the sum of $483,163.95 and to Messrs. Jones, Haycock & Co. the sum of $511,391.54. On the 29th January, 1863, the report of the Commission was submitted, and amongst other things recommended that the work remaining to be done should be offered to the original contractors at a schedule of prices fixed by them (the Commissioners).

The Government acceded to this proposition and it was also agreed to by the Contractors, and on the 18th April, 1863, contracts were entered into with Thomas McGreevy, for the completion of the Parliament Buildings and with Messrs. Jones, Haycock & Clarke, for the completion of the Departmental Buildings at a schedule of prices to be applied to the different classes and items of work. Under this arrangement the alleged claims arising out of first contracts were held in abeyance.

On a revision of the specifications it was deemed advisable that instead of paying the architects a commission as heretofore they should be paid fixed salaries, and Mr. Thomas Fuller and Mr. Chas. Baillargé, were appointed Joint Architects for all the Buildings, and in accordance with the provisions of the new contract a general Superintendent was also appointed. To settle the claims arising out of the first contract and for claims by the Architects for matters arising out of their supervision for which they preferred claims, the Government appointed an arbitrator, the claimants another, and these two selected a third, and after due deliberation awarded as follows: to Messrs. Jones, Haycock & Clarke, first contract on Departmental Buildings, on the 8th May, 1886, the sum of $88,176 and for costs $2,203; in the cases of the Architects, Messrs. Fuller and Jones, $5,064 and $181 costs; and to Messrs. Stent & Laver, $6,931 and $200 costs.

Considerable progress was made with the works during the season of 1863, and during the Session a further sum of $100,000 was granted towards construction.

May, 1864, it was deemed advisable that the Chief Engineer should assume control of the works at Ottawa, in order that questions arising there could be settled without the delay of referring to the Department

WESTERN BLOCK, (DEPARTMENTAL BUILDINGS

at Quebec. The method of furnishing supplies of gas, water, &c., was decided, and the necessary work commenced. During the season of this year the building operations were vigorously pushed forward, and a further sum placed in the Estimates of $400,000 towards their completion. In May, 1865, the services of Mr. Baillargé were dispensed with, and in the same month and year, it was decided that the Public Departments be removed to Ottawa the Fall ensuing, and the contractors were notified to make extra exertions to put the buildings in order for their reception by that time. The clearing and grading of the grounds was undertaken and proceeded with, also the laying out and making of roads to the different buildings pushed forward. In the month of October the buildings were reported far enough advanced to permit of their occupation by the several Departments to which they had been allotted. The roads were partially made, and about this time the removal of the Government took place. The wings and central portion of the Parliament Buildings were also sufficiently forwarded to admit of a number of the offices being occupied, and of the books of the library being placed in the building. This year the Legislature granted a further sum of $300,000 towards the completion of the works. In May, 1866, the claims of Thos. McGreevy were referred to the Chief Engineer as arbitrator, who awarded him, on the 12th November, on account of first contract the sum of $61,785. The two Chambers and other necessary rooms were so far completed as to admit of a session being opened, which took place (the first in Ottawa) on the 8th of June, 1866, a day long to be remembered, and of which the people of Ottawa and surrounding country may feel justly proud, being in so short a time transformed, as it were, from a remote backwoods town to a city, the chosen Capitol for the several Provinces, since consolidated, and now forming the Dominion of Canada, with the advantages of periodical visits from the country's legislators, and still more, that the selection of the site on which to erect the Government Buildings of Canada was made in their midst, and that it was the choice of no less a personage than Her Most Gracious Majesty the Queen. During the session a further grant of $500,000 was made toward the building fund. In November, 1866, Thomas McGreevy, by permission given him, transferred his contract for the Public Buildings to Robert H. McGreevy. By the Fall of this year the Departmental Buildings were completed, and in March, 1867, a settlement in full was made with

the contractors for all work performed under and connected with the new or second contract, and which, in the aggregate, amounted to the sum of $436,199.72.

In February, 1867, authority was granted to make certain alterations in the Legislative Assembly Chamber for the accommodation of the increased number of members forming the House of Commons under the Confederation of the Provinces. In the spring of 1867, the Departmental Buildings being completed, and the Parliament Buildings well advanced, the staff was considerably reduced, and in May of that year the services of Mr. Thos. Fuller, architect, were dispensed with.

Now that we have pursued the rise and progress of these noble structures, it will seem in order to give a general description of their outline, situation and surroundings. They were constructed from 1859 to 1865, and consist of three detatched structures situated on the south side of the Ottawa River, on what was formerly and familiarly known as "Barrack Hill." The site on which these buildings stand rises about 159 feet above summer level of the river and commands a view of the entire surrounding country. Buildings are erected on the northern, eastern and western sides of the hill, leaving a rectangular plot in the centre measuring 600 feet from north to south, and 700 feet from east to west, along Wellington street. The Parliament House in which, as before mentioned, the Legislature assembled for the first time on the 8th June, 1866, stands on the north side of the quadrangle upon which it presents a front of 472 feet in length, and two storeys in height, above the basement; its breadth being 370 feet at the centre, and 181 feet across the main eastern and western entrances. The Eastern Block has two principal facades at right angles to each other: one 319 feet in length upon the square, and the other 245 along Wellington street. The Western Block is somewhat similar in shape to the Eastern, being a frontage of 220 feet on the square, and 277 feet along Wellington street. Further accomodation being required, contracts were entered into at the

dates following: for the "extension" of this block, which was completed and occupied in January, 1877, viz: basement walls on 11th May, 1875; the super-structure on 29th November, 1876. The new building which is 245 feet in length by 60 feet in width, faces the Union Suspension Bridge, which spans the Ottawa River immediately below the Chaudière Falls. The building covers an area of 17,900 square feet, furnishing 58 additional offices in the three upper floors, besides 10 rooms in the basement. The main tower, which is 274 feet in height from ground to top of finial, is situated about the centre of the western front, and contains the principal entrance and vestibule. Cost of "extension" $462,247.11.

At the time of Confederation the foundation walls of the Parliamentary Library building had been carried up to the plinth course and the exterior works partly executed. By Order-in-Council dated 29th February, 1868, the Government directed that the construction of the Library should not be proceeded with. The works were consequently suspended, and were not resumed until the 18th November, 1870, when a contract was entered into for the completion of the walls; the material for the roofing (iron) arrived from England about the same date, and the building was completed and occupied in 1877. It is circular inside, and ninety feet in diameter. The main wall is about four feet thick and its exterior face forms a polygon of sixteen sides, at each angle of which is a flying buttress spanning the roof of the lean-to and joining the main wall at a height calculated to resist the thrust of the roof. The Library is floored with Canadian woods, viz: oak, ash, cherry, and walnut; fittings and book cases of pine, the latter in three storys with eight divisions, the spaces between forming small alcoves enclosed with iron railing. The upper storeys have projecting galleries floored with glass, and iron railing. These galleries are reached by stone stair-cases. The Library has accommodation for 103,000 volumes, and it contains that number, of which 60,000 are in the centre room. Cost of completion, $301,812.45. It may not be considered of general interest in a work of this kind to give place to further detail in prices, but the items are as follows: completing main tower, making the attics habitable as offices—arising from the necessity of the growth of the several Departments, the growth being caused by the opening of the North-West, etc.—clearing the grounds, making roads through grounds, fence walls, terrace walls, lamps and lamp posts in grounds, excavating, Supreme Court building and Con-

servatory, making a total to 30th June, 1882, expended		$4,178,990 04
Further sums were granted for the following purposes :—		
The more efficient exit from galleries in Houses of Parliament; for better ventilation, &c.; and the total expenditure for buildings and grounds during year is as follows :—

The continued increase in the business of the country, and consequently the enlargement of the Deparmental Staff has been seriously felt for some time past, the Departmental Building being overcrowded ; and as they cannot be further enlarged without seriously detracting from their symmetry it was decided to acquire a suitable site outside the Parliament Grounds and there erect a new Departmental Building. For this pupose the sum of $84,000 was voted at the session of 1883, and the Northern half of the block bounded by Wellington, Metcalfe, Elgin and Sparks Streets, which fronts on Wellington Street, was purchased by the Government. The work of demolishing the buildings thereon has been accomplished, and the excavating is being proceeded with.

Expenditure during the year $70,419.95. A description of dimensions Architecture, &c., will be given in second Edition.

SIMON JAMES DAWSON, (*Prince Arthur's Landing.*)

Was born in Scotland; educated there; came to Canada when young; a civil engineer; appointed 1851 to plan and superintend the construction of extensive works, then contemplated, on the St. Maurice, to open up the vast pine regions of that river and its tributaries, which had been previously almost inaccessible to the lumber trade, which works he carried out successfully; appointed 1857 to explore the country from Lake Superior to the Saskatchewan, and report upon its adaptability for settlement and the practicability of opening up communications therewith; resigned the office after completing his reports, and carried on business for some years as a lumber merchant on the St. Maurice; in 1868 was called upon to commence the construction of the route to Red River, now known as the "Dawson Route," and in 1870, although comparatively little had been done owing to the limited means appropriated therefor, put through the Red River expeditionary force under Col. Sir Garnet (now Gen. Lord) Wolsely, when all other means of reaching the country, to subdue the insurrection, had proved unavailing; was Joint Commissioner with Lieut.-Governor of Manitoba, and the Indian Commissioner of the North-West in concluding a treaty with the Saulteux tribe of the Ojibbeway Indians, 1873; resigned charge of the Dawson Route on becoming a candidate for Algoma, for which he was returned at general election for Ont., 1875; resigned his seat in the Local Leg., and was returned for the Commons at general election, 1878; re-elected at last general election; independent in politics; has stated in the Legislature that in his opinion it would be to the advantage of the Dominion that the great central region known as Algoma, extending from the 81st to 95th meridian, that is from French River to the Lake of the Woods, should be formed into a separate Province. BOTHWELL.

Hon. David Mills, *LL. B., P. C., (London.)*

Was born in the Township of Orford, Kent, Ontario, 18th March, 1831; graduated at Michigan University; was Superintendent of Schools for County of Kent from April 1856 to April 1865; was employed by Ontario Government to define the North-Western boundary of the Province 1872; author of a pamphlet on *The Present and Future Political Aspects of Canada* (1869); and another on *The Blunders of the Dominion Government in Connection with the North-West Territory* (1871); elected a member of the Council of Public Instruction for Ontario (representing the School Inspectors) August, 1875; an unsuccessful candidate for a seat in the Council of Public Instruction, Ontario, 1874; first returned to Parliament for present seat at general election, 1867; re-elected at general election 1872; at general election 1874; again at general election 1878, and again at last general election, as decided by Supreme Court of Canada; sworn of the Privy Council and appointed Minister of Interior October, 1876, which position he held until resignation of Government, October 1878; favors the amendment of the Constitution so as to provide for the election of the Senate; for the appointment of Provincial Judges by the Provincial Executives, and the complete separation of Provincial and Federal jurisprudence; was opposed to admission of British Columbia into the Union, as premature, and the terms of Union as preposterous. He was of opinion that, with more than two thousand miles of unsettled territory between the Upper Ottawa and British Columbia, we were not in a position to undertake the responsibility of governing the country upon the Pacific coast. He held that railway construction, if needed in British Columbia, was a work to be undertaken by Imperial rather than by Canadian authority. He was opposed to pledging Canada to the construction of a continuous line of railway to the Pacific, as wholly beyond the resources of this country. Favors the Government of Canada by the Canadian Parliament, and not by despatches from the Colonial Office. Holds that power to legislate upon the subjects of navigation and shipping carries with it power to establish Courts to adjudicate upon matters arising under such legislation, in accordance with the well settled rules of the maritime laws; favors a national policy, based not upon principles of commercial exclusion but upon principles of commeraial extension; thinks Canada has outgrown the condition of an ordinary colony; she has commercial relations with foreign States, in which she alone is interested, and which she alone ought to regulate and control on her own behalf; is opposed to the people's representatives abdicating their functions, either by failing to maintain effective control over the expenditure of the national resources or by surrendering to the Crown and Privy Council an important part of their legislative functions; does not regard an enormous public debt as a national blessing; and believes that the prosperity of the country is to be promoted by habits of economy among the people, by encouraging a feeling of self-reliance and personal independence, and by fostering a spirit of patriotism—not flunkeyism—by which the interest, the prosperity and the honor of Canada are made the paramount duty of their representatives, and not upon gigantic and costly works built in wild and uninhabitable regions; considers the present state as one of transition, and regards the Confederation of the Empire, for certain specified purposes, as the most satisfactory solution of our political future. Opposed by J. J. Hawkins.

The following statement of Mr. Blake's political views is summarized from his speeches as a private member: "An Independent Liberal; believes that the basis of the franchise should be widened, and that efficiency instead of influence should be the passport to the public service; thinks political progress essential to political vitality, and advocates the fullest freedom of discussion on all topics affecting the public interests; supports the adoption of a system of proportional representation, whereby, among other improvements, the strength of the various opinions held by the people may be more nearly represented in Parliament; considers that, as the franchise is not merely a right, but a trust, the wilful neglect to vote should be followed by temporary disfranchisement; is opposed to the appointment of Senators for life by the Administration, and desires their selection for a term of years by the Provinces; thinks that the future of Canada depends very largely on the development of the great North-West; advocates the construction, as rapidly as the resources of the country will permit, of the sections of the Pacific Railway necessary for communication between that country and our interior sea-board, in conjunction with an extensive scheme of exploration and colonization; believes that the cultivation of a national spirit is requisite to the success of the Union; that the present form of connection between England and Canada does not possess the element of permanence; that, as the child grows into the man, so the State will come to maturity, and that (notwithstanding the enormous difficulties which surround the scheme) there is a possibility and hope of reorganizing the empire on a Federal basis, so as to reconcile British connection with British freedom." Was born near Dunkeld, Perthshire, 28th Jan. 1822; educated at the public schools of Moulin, Dunkeld and Perth; came to Canada in 1842; in youth learned the business of a builder and architect, and after arrival in Canada became a contractor; for some years edited the *Lambton Shield*, a Reform journal; is President of the Isolated Risk and Farmers' Fire Ins. Co.; was Major 27th Lambton Batt. of V.I. for some years up to Oct. 1874, when he resigned; was a member of the Executive Council and Treasurer of Ontario (in Mr. Blake's Administration), from 21st Dec. 1871 until Oct 1872, when he retired with Mr. Blake for the purpose of confining themselves entirely to Dominion politics; declined a seat in the Canadian Cabinet on the occasion of the retirement of Mr. Brown, 1865; was leader of Ontario Reform Opposition of House of Commons from the Union until 1873, when elected leader of the whole Opposition party, and continued in that position until 5th Nov. 1873, when, owing to the resignation of Sir John Macdonald, he was called on to form a new Administration, a duty he succeeded in accomplishing on the 7th of the same month, when he and his colleagues were sworn of the Privy Council, he (Mr.

MacKenzie) taking the office of Minister of Public Works, which he held until he resigned, with the other members of the Ministry, Oct., 1878; proceeded to the Mother Country in June, 1875, and while there was presented with the Freedom of Irvine, Dundee and Perth, and visited Her Majesty at Windsor Castle; during a visit to Scotland, 1881, for the benefit of his health was presented with the Freedom of Inverness; sat for Lambton in Canadian Assembly from 1861 until the Union; returned to Commons at general election, 1867, and at general election, 1872; again at general election, 1874; re-elected by acclamation on his appointment to office; and again elected at general election 1878; owing to ill-health he withdrew from contesting Lambton at general election 1882, but was induced to stand for present seat to which he was elected; represented West Middlesex in Local House from general election 1871 until Oct. 1872. when he resigned. Several important measures owe their existence to Mr. MacKenzie as a private member, viz: the Act amending the Assessment Act of U.C., (1863); that consolidating and amending the Acts relating to the Assessment of Property, U.C. (1866); and the highly useful measure for providing means of egress from Public Buildings, (1866). As Chairman of Committee on Municipal and Assessment Laws (1866), wrote and framed the greater part of the General Act on Municipal corporations, etc. All the measures of his Government, including the enactment of a stringent election law, with the trial of election petitions by judges, and vote by ballot; the abolition of the real estate qualification of members; the inspection of produce and weights and measures; the better administration of penitentiaries; the enactment of the Marine Telegraph Law, which virtually abolished the monopoly of the Cable Company; the establishment of a Dominion Military College, and the improvement of the militia system; the enlargement of the canals; the permanent organization of the Civil Service; the establishment of a Supreme Court for the Dominion; the reduction of postage to and from the U.S.; the free delivery of postal matter in cities and towns; the opening of direct mail communication with the West Indies; the construction of a transcontinental telegraph line; the better administration of Government Railways; an improved copyright law; the adoption of a final route for the Pacific Railway; the opening of negotiations, conducted on our behalf by our own delegate in person, between Canada and the U.S., for the establishment of an equitable Reciprocity Treaty between the two countries; a new insolvent law; and the establishment of a Territorial Government for the great North-West, have all been more or less moulded and directed by him. In addition, two very important questions which for some time agitated the public mind and threatened the gravest complications—the Manitoba amnesty and the New Brunswick school questions—were satisfactorily adjusted during Mr. MacKenzie's administration. A Liberal; and has always held those political principles —which by some in England may be considered peculiar—of the universal brotherhood of man; no matter in what rank of life he may have taken his origin. Has believed, and now believes, in the extinction of all class legislation, and of all legislation that tends to promote any body of men, or class of men, for the mere fact of their belonging to a body or class, to a higher position politically than any other class in the country. In our great colonies, while no fault is found with the political organization of the Mother Country, or of any other country, we take our stand simply and completely on the ground that every man is equal in the eye of the law, and has the same opportunity, by exercising the talents with which God has blessed him, of rising in the world, in confidence of his fellow citizens—one man quite as much as another. Believes thoroughly in party government, and that it is utterly impossible to conduct the government of a new country without it. While an earnest advocate and upholder of the present connection with the Mother Country, he will always endeavor to maintain Canadian rights and to bring

Canada into prominence in the eyes of the world. Opposed by Alfred Boultbee.

Was born at Vercheres, P.Q., December 1823; received his classical education at Montreal Seminary; studied medicine at McGill College, where

he took his degree of M.D. 1845; served as a surgeon at Quarantine, Grosse Isle, during 1847 (fever year) and 1848; aided in 1849 in forming a special mounted constabulary force for quelling disturbances of the peace in Montreal and adjoining districts, a troop of which was placed under his command; in 1852 he was appointed Stipendiary Magistrate for the Lower River and Gulf of St. Lawrence, and in that capacity he organized the service for the protection of the sea and river fisheries in those parts. He was at the head of that service from 1852 until the Union, when he resigned, and in that position he first had under him the armed steamer *Doris*, and afterwards the armed schooner *La Canadienne*, built specially for the service, in which latter vessel he was wrecked in November 1861, during a violent snow storm on the North Coast; in 1859 he established on all the coasts and in the rivers of the Province of Quebec the system of licenses for the salmon fishing. In 1862, Mr. Fortin began a work on the marine animals, fishes, mollusca, crustacea of the Lower River and Gulf of St. Lawrence; he described over eighty species of them, and his descriptions, made from nature in nearly all cases, were printed in some of his annual reports to the Government—see report of 1862, and following. Mr. Fortin in several of his reports described the fishing coasts of the Province of Quebec, 1,200 miles in extent, and the different fisheries that are carried on in these parts; he has given valuable statistics, especially since the year 1862, when he appointed a formula which is still followed. In 1858, Mr. Fortin was instructed by the Government of Canada to visit officially the French Colonies of St. Pierre, Miquelon and Longlake, with a view to study the conditions under which the French fisheries and fish trade were carried on, both around St. Pierre and on the west, north-west and north coasts of Newfoundland, commonly called the French Coasts. Mr. Fortin was cordially received by the Governor and authorities of St. Pierre, and every facility offered him to fulfil his mission, while the schooner yacht *La Canadienne*, Quebec built, was much admired by the shipbuilders and others there. Mr. Fortin reported to the Government of Canada on his mission and gave interesting accounts of the French Fisheries of St. Pierre and neighbouring coasts. In 1868, Mr. Fortin, in order to make himself better acquainted in everything appertaining to navigation, shipping, shipbuilding and the fisheries, visited the Maritime Exhibition at Havre, France, which, as everyone knows, was a very successful one; he brought back with him a great deal of information regarding the fisheries and navigation, which formed the subject of much correspondence published by *La Minerve*. Was a member of the Executive Council and Commissioner of Crown Lands for the Province of Quebec from February 1873 until 7th September 1874, when he resigned; elected Speaker, 4th November 1875, but resigned in 1876, in consequence of his election being protested. While Speaker of the Legislative Assembly of Quebec he founded the Marine Library of the Province of Quebec, and procured several hundred books relating to shipping, etc., and over 500 marine charts from all parts of the world; also enlarged the exchanges between the Quebec library and libraries of the United States, England and France. Was one of the founders of the Geographical Society of Quebec, and was its first President. Was from 1867 to 1874 Chairman of the Special Committee of the Commons on Navigation and Fisheries. Sat for Gaspé in House of Commons from general election 1867 until general election 1874, when he retired in order to confine himself to the Local House, for which he was first returned at general election 1867; re-elected by acclamation at general election 1871, again returned at general election 1875, unseated on petition, and re-elected 1877; did not offer for re-election at last general election for Province of Quebec, in consequence of the electors of the Magdalen Islands, where he had obtained a large majority, being deprived of their votes, the dates of the nomination and polling being so fixed that the Returning Officer claimed navigation was not open at the Islands,

and did not try to have the proclamation posted there. Elected for present seat at general election 1878, and again by acclamation at last general election. A Conservative. In favour of a system of nautical education with a view to perfecting the scientific instruction of our marines, and thereby making them equal to the best in the world; also empowering our Marine Boards to examine candidates for extra-masters' certificates, and completing the improvements of the St. Lawrence water-course, comprehending the lakes, canals, river and Gulf of St. Lawrence, so as to make it the chief commercial artery of this continent; and firmly believes that the necessary improvements in the postal and telegraphic communications in the Gulf of St. Lawrence and the sea coasts of the Maritime Provinces are essential to completely attain that object.

PROVINCE OF ONTARIO.

The Law Society of Ontario.

The Law Society was first established in 1797, by the Act 37, George III, cap. 13, which enabled the then practitioners of the law to form themselves into a society, and make rules for its government. By the Act of 1822, 2 Geo. IV., c. 5, "the Treasurers and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. By Revised statutes of Ontario, c. 138, the Benchers theretofore appointed, from time to time, by their own body, are made,

exclusive of *ex-officio* members, elective by the Bar; the *ex-officio* consisting of the Attorney-General of the Dominion for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former Province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the *elective*, thirty in number, being chosen by the ballot, for a term of five years, by the members of the Bar in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers On the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in Convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to Practice, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or headquarters of the Society, in which is provided accommodation for the Court of Appeal and Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

Courts for the Trial of Controverted Elections.

The nature of these courts is sufficiently indicated in their title. In respect to elections for the House of Commons of Canada, the Superior Courts, by one of their Judges appointed in that behalf, are invested with special Jurisdiction for the trial of contested elections, and appeals lie to the Supreme Court at Ottawa. In respect to elections for the Local Legislature of Ontario, the Judges of the Court of Appeal and of the Superior Courts of Law and Equity meet annually in Michaelmas Term and severally select, by a majority of votes, a Judge of their respective Courts, to be placed on the rota for the trial of election petitions. In the case of death or the illness of a Judge so chosen, the Court of which he is a member meet and elect another Judge. Trials involving corrupt practices are presided over by two Judges, otherwise a single Judge presides, and an appeal lies to the court of Appeal of the Province.

County Courts.

Presided over by a resident Judge in each County, assisted in some counties by a Deputy or Junior Judge. Their Jurisdiction extends to all personal actions where the debt or damages claimed do not exceed $200; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant, to $400; and to all bail bonds and recognizances of bail given in the County Court, to any amount; but not to cases involving the title to lands, validity of wills, or actions for libel, slander, crim. con., or seduction. An appeal lies to the Court of Appeal of Ontario.

County Court Sittings and Court of General Sessions.

The County Judge in each county holds a sitting of his Court and a Court of General Sessions in his county semi-annually, on the second Tuesday in June and December, except in the County of York, in which county said Court is held four times, commencing on the first Tuesday in December and March, and the second Tuesday in May and September, the latter Courts for

the trial of cases of felony and misdemeanor, but treason and capital felonies are exempted from their jurisdiction. The Judge may also, in his discretion, hold additional sittings at such times as may be deemed expedient to expedite business, but only for the trial of issues of fact without a jury.

County Judges' Criminal Court.

Persons committed to jail for trial, on charge of being guilty of any offence for which they may be tried at a Court of General Sessions *may, with their own consent,* and subject to the provisions of the Act in that behalf, be forthwith tried by the Judge of the County Court and General Sessions without a jury, and if convicted, be sentenced by the said Judge; and the Judge sitting on any such trial, for all the purposes thereof, is constituted a Court of Record, and the record in any such case shall be filed among the records of the Court of General Sessions last mentioned.

Courts of Revision.

The County Judges hold annually Courts of final revision of the Assessment Rolls of each Municipality, being in the light of Courts of Appeal from the first Court of Revision held by the Municipality; and also Courts for the Revision of the Voters' Lists, being equivalent to the Courts held by Revising Barristers in England.

Insolvent Debtors' Courts.

These Courts, which had reference to traders only, were regulated by the Act known as the "Insolvent Act of 1875," which consolidated and assimilated the practice in Bankruptcy and Insolvency in the several Provinces in the Dominion. The County Judges in the several counties presided, and official assignees were nominated by the Governor in Council, and were officers of the Court having jurisdiction in the County or District for which they were appointed. And appeals lay to the Court of Appeal of Ontario. This Statute has now been repealed, and the Courts and Assignee are only continuing to wind up pending cases.

Surrogate Courts.

The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting and revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effect in Ontario, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Chancery Division. The County Judges are also Judges of the Surrogate Courts.

Chief Surrogate Clerk at Toronto—Sir J. L. Robinson, Bart.

Division Courts.

For the summary disposal of cases by the presiding Judge, being the County Judge or his Deputy, or any Barrister appointed to hold the same; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract where the balance claimed is over $100 and under $200, when the amount is ascertained by the signature of the defendant, subject to an appeal to the Court of Appeal, and to $100 in other

cases; but the sums of the account to be gone into cannot exceed $400; injuries or torts to personal chattels amounting to $60; and personal actions to that amount, if not excepted from their jurisdiction; but not to actions for gambling debts, liquors drunk in a tavern, or notes of hand given therefor, ejectment, title to land, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, crim. con., seduction or breach of promise, or actions against a J. P. for anything done by him in the execution of his office, if he objects to it. Each Judicial District is divided into Court Divisions, and Courts are held once in two months in each Division, or oftener at the discretion of the Judge. The Divisions are established by the Courts of General Sessions, and in certain cases by the Judges.

DOMINION OF CANADA.

CONSTITUTION AND GOVERNMENT.

The Dominion of Canada consists of the Provinces of Ontario, Quebec, (formerly Upper and Lower Canada), Nova Scotia, New Brunswick, Prince Edward Island, Manitoba, British Columbia and the North West Territories. The first four provinces were united under the provisions of an Act of the Imperial Parliament passed in March 1867, and known as "The British North America Act 1867," which came into operation on the 1st July, 1867, by Royal Proclamation. The Act provides that the Constitution of the Dominion shall be similar in principle to that of the United Kingdom; that the executive authority shall be vested in the Sovereign of Great Britain and Ireland, and carried on in her name by a Governor General and Privy Council; and that the legislative power shall be exercised by a Parliament of two Houses called the Senate and the House of Commons. Provision is also made in the Act for the admission of Newfoundland—still a self-governing Crown colony—into the Dominion of Canada. October 1876, by an Act 38 Vic., cap. 49, the North West Territories, excepting the portion already comprising the Province of Manitoba, were formed into a separate and distinct government. They (the Territories) are governed by a Lieutenant-Governor assisted by a council of five members, and subject to instructions given by Order-in-Council at Ottawa and forwarded through the Minister of the Interior or the Secretary of State for Canada. Representatives may be returned from time to time to council or assembly according as districts containing an area of 1,000 square miles attain a population of not less than 1,000 inhabitants of adult age exclusive of aliens or unenfranchised Indians.

The members of the Senate of the Parliament of the Dominion are nominated for life by summons of the Governor-General under the Great Seal of Canada. By the terms of the constitution there may be 78 senators, viz., 24 from Ontario, 24 from Quebec, and 24 from the Maritime Provinces, divided as follows:—10 from Nova Scotia, 10 from New Brunswick, and four from P. E. Island—3 from Manitoba and 3 from British Columbia. A senator must be 30 years of age, a born or naturalized subject, and possessed of property real or personal of the value of $4,000 in the province for which he is appointed. The House of Commons of the Dominion is elected by the people for five years, at the rate of one representative for every 17,000 souls; at present on the basis of the census returns of 1881, the House of Commons should consist of 213, as follows:—93 for Ontario, 65 for Quebec, 21 for Nova Scotia, 16 for New Brunswick, 7 for Prince Edward Island, 5 for Manitoba, and 6 for British Columbia.

The members of the House of Commons are elected by constituencies, varying in the different provinces. In Ontario and Quebec a vote is given to every male subject being the owner or occupant or tenant of real property of the assessed value of 300 dollars or of the yearly value of $30.00 within cities or towns, and of the assessed value of $200 or the yearly value of $20.00 if not so situate. In New Brunswick a vote is given to every male subject of the age of 21 years assessed in respect of real estate to the amount of 100 dollars, or of personal property or personal and real amounting together to $400.00, or $400 annual income. In Nova Scotia the franchise is with all subjects

of the age of 21 years assessed in respect of personal estate or of real estate to the value of $150, or in respect of personal estate or of real and personal together to the value of $400. Voting is by ballot.

The Speaker of the House of Commons is paid a salary of $4,000 per annum, and each member an allowance of 10 dollars per diem up to the end of 30 days, and for a session lasting longer than that period the sum of $1,000 with, in every case, 10 cents per mile for travelling expenses. The sum of $8 per diem is deducted for every day's absence of a member unless the same is caused by illness. The same applies to members of the Senate regarding allowance, mileage, etc., etc.

The seven provinces have each a separate parliament and administration with a Lieutenant-Governor at the head of the Executive. They have full power to regulate their own local affairs, dispose of their revenues, and enact such laws as they may deem best for their own welfare, provided only they do not interfere with or are adverse to the action and policy of the Central Administration under the Governor-General.

THE GOVERNOR GENERAL.

Is Chief Executive Officer, carrying out the Government of Canada on behalf and in the name of the Queen, and is a corporation sole; and all bonds and other instruments by law required to be taken to him in his public capacity, are taken to him by his name of office, and may be sued for and recovered by him by his office as such; and the same may not in any case vest in the personal representatives of the Governor General, in whose name they were so taken. The Queen may, if Her Majesty thinks fit, authorize the Governor General from time to time to appoint any person or persons jointly or severally to be his deputy or deputies within any part of Canada, and in that capacity exercise, during the pleasure of the Governor General, such of the powers and functions of the Governor General as he, the Governor General, deems it necessary or expedient to assign to him or them, subject to any limitations or directions expressed or given by the Queen; but the appointment of any such deputy or deputies shall not affect the exercise by the Governor-General himself of any power, authority or function. The Governor General is paid yearly, and *pro rata* for any period less than a year, a salary of ten thousand pounds sterling, being equal to forty-eight thousand six hundred and sixty-six dollars and sixty-three cents, which is paid out of the Consolidated Revenue Fund of Canada, and forms the third charge thereon.

The Director, for the purpose of obtaining an accurate basis from which the geological and topographical features of the country may be ascertained, and for the purpose of connecting together local and partial surveys, may cause such topographical, geographical or other measurements or observations to be made, and such monuments or marks to be placed as may be deemed necessary.

THE CITY OF OTTAWA.

Capital of the Dominion of Canada, is picturesquely situated on the south shore of the river of the same name, or familiarly known as the "Grand River," in the County of Carleton, Province of Ontario, about 87 miles from its confluence with the St. Lawrence River and at the point of junction of the Gatineau and Rideau Rivers and Rideau Canal with the Ottawa River. The celebrated Chaudiere Falls are situated at the west end of the city, and are spanned by a handsome suspension bridge erected by the Government at a cost of nearly $67,000, which unites the Provinces of Ontario and Quebec. At the north-east of the city the Rideau River falls into the Ottawa, forming two beautiful cataracts, over 40 feet in height. The city is distant about 120 miles from Montreal, the same from Kingston, 280 miles from Toronto and 75 from the Town of Brockville. The city is easy of access from all points. The following are the railroads running into the city: Canadian Pacific—the Canada Atlantic, connecting with Grand Trunk going east—the St. Lawrence and Ottawa, connecting with the Grand Trunk going west—and that known as the Ontario and Quebec Railway, running to Toronto—and the North Shore, running to Montreal and Quebec, the two latter now links of the C. P. R.; as well as a line of steamers plying between Ottawa and Kingston, on the Rideau Canal, passing through the magnificent scenery of the Rideau Lakes, which rival, if not excel in grandeur, their perhaps more extensive sisters the Thousand Islands of the St. Lawrence. This line connects during navigation with the steamers on the Lakes Ontario, Huron, &c., and the Ottawa River Navigation Co.'s Line of Steamers to Montreal where, along the river banks a grand display of natural scenery is visible to the excursionist. The River Ottawa takes its rise near the 49th parallel of north latitude, and descends some rugged stretches over a course of about 400 miles. This river drains an area of 57,900 square miles, and its banks are so high that it gives to the land adjacent an admirable system of natural drainage—hence Ottawa's boast of being one of the most healthy and pleasantly situated cities in the Dominion.

The Town of Bytown, out of which Ottawa has developed, was founded by Col. By, R. E., in the year 1827, the same year in which the Rideau Canal was undertaken to be built, this work being performed by the Imperial Government for military convenience, as a means of communication between Quebec and Lake Ontario. Ottawa is proud of its being selected by Her Majesty the Queen as the Seat of Government for Canada, although it had a strong rivalry in the older and larger cities of Toronto, Montreal, Quebec, and even Kingston at that time. The city can fairly be proud of the natural beauty of her surrounding scenery. Certain views along the Gatineau River and in the valley are admitted to be, by all who have had the pleasure of beholding them, unsurpassed for natural grandeur in America, and require the pen of an artist to describe them.

The Act incorporating Ottawa as a city, was passed in 1854; it then comprised ten thousand inhabitants. The Act came into operation 1st Jan., 1855. Its annual assessment, at present is about $12,000,000, and it has a population of about 30,000. A few of the leading industries, public buildings, &c., may be here enumerated and seem in order. The lumbering interests are on an extensive scale, and the amount of money invested in the prosecution of this enterprise alone, is marvellous. The iron mines, in close proximity to the city, is another source of wealth, also the phosphate mines in the same region. The mercantile trade of the City is well represented (wholesale and retail) in all its branches; and manufacturing, although it has not reached the

extent it should have, where so many rare privileges offer, is gradually growing and may, perhaps, in the near future, so develop, as to assume ponderous proportions.

The following papers, periodicals, and annuals, are published in the City:—

"The Ottawa Citizen," published daily, and semi-weekly, 31 Metcalf St.
"The Free Press," daily and weekly, corner of Elgin and Queen Sts.

ADDENDA.

Circumstances having prevented the issue of this work at the time originally intended, and a review of the Parliamentary and Departmental Buildings having been printed which included up to 26th June, 1883, it will be further necessary to give a brief account of the advancement since made, and expenditure incurred to 30th June, 1884. The Editor concluded in his previous description with a statement of a vote passed for a sum of $64,000 towards purchasing a site whereon to erect the required additional buildings. During the session of 1883 a sum of $207,000 was also voted by Parliament for the purpose of erecting a suitable building thereon. As described in the closing portion of the review, the site fronts on the south side of Wellington Street, and extends about half way through to Sparks Street. It is bounded on the east and west by Elgin and Metcalfe Streets respectively. The total cost of the site was $89,136.84, a little over the first estimate. On the 28th September, 1883, a contract was entered into with Mr. A. Charlebois of Quebec, for the erection of the new building, for the sum of $295,000, and work has been progressing so favorably that the foundations were completed and covered over for the Winter before the termination of the building season. The contractor is further taking advantage of the cheap labor season, and has erected sheds, &c., where he is preparing the heavy stone that requires much time and labor in dressing, thereby facilitating the speedy accomplishment of his contract. The building is intended to be faced with sandstone, backed with brick, on a solid stone foundation. The floors and ceilings to be constructed with wrought iron girders and rolled iron joists with brick arches between and concrete on top; the entrance halls and corridors to be laid in encaustic tiles set in cement; the roofs are to be constructed of wrought iron covered with slate. The Wellington Street elevation is 280 feet long; the Elgin Street, 110; the Metcalfe Street, 99 feet. There will be sub-basement, basement, ground, first, second and attic floors. The Wellington Street elevation will include basement, three stories and attic, and will be broken by a central projection and two angle pavilions, projecting 12 feet. The general height of this elevation, from level of sidewalk to deck of roof, will be 96 feet, the central projection being however carried up to 112 feet, and the angle projections 104 feet above level of sidewalk. In a future edition, when the building is completed, it will be in order to give a more detailed description of its interior and general appearance.

Total expenditure on the building, $115,604.17. Since previous reference to the public buildings, further improvements have been made, viz:

The north-western entrance to the apartments of the Speaker of the House of Commons was altered and a stone porch erected over the landing of the outside steps. A further extension of the ventilating system of the House of Commons has been made, and the result it is said, has proved satisfactory. The incandescent electric lighting of the Parliament Buildings has also been effected, and for that purpose two installations were constructed for the lighting of the vestibule and corridors of the Senate and Commons, the Speaker's apartments, the basement, corridors, the restaurant, the official reporter's room and the press room. The lighting of the Commons side was done by the United States Electric Lighting Company of New York, and the main vestibule and the lighting on the Senate side, by the Edison Electric Lighting Company of Hamilton, Ontario.

Total expenditure on these buildings for construction..	$4,205,052 08
Repairs at different times.....	1,307,002 91
Total.....	$5,512,054 99

The editor trusts to be enabled to collect and publish annually in this book, in brief and interesting form, information relating to the public buildings throughout Canada, and to furnish cuts of the more pretentious Government edifices in the several Provinces.

The Library of Parliament has so far increased the number of the volumes, that instead of 103,000 as given in previous review it contains in last report 111,200 volumes.
